

Plenum boxes

FLX-PRO-P...

Description

FLX-PRO-P plenum boxes are connecting pieces for FLX-HDPE and FLX-HDPE-A flexible ducts, which form a distribution system for mechanical installations, including recuperator systems.

Due to small size, they do not require a lot of space or special installation. This allows to save more usable interior space. FLX-PRO plenum boxes are made of galvanized steel.

On special request, it is possible to make the plenum boxes using stainless steel.

It is possible to order insulated FLX-PRI-P plenum boxes. Plenum boxes are inside insulated with technical insulation with thickness of 9mm. Weldings are made outside the plenum boxes.

Note:

Standard diameter d_1 is made as nipple. On special request diameter d_1 can be made as female dimension.

Example

Product code **FLX-PRO-P - 75 - 10**

type _____
 diameter _____
 connections _____
