

## Couplings/Asymmetric reducer

# FLX-VNS / FLX-VODS

### Description

FLX-VNS nipple connector for flexible ventilation ducts. Plastic connectors feature nipple type connection to the duct to connect longer sections of the home ventilation to heat recovery.

Asymmetric reducer FLX-VODS for flexible air ducts. The FLX-VODS asymmetric reducer, apart from connecting ducts also vertically reverses the cross-section. It is used whenever we need to connect the plenum box to an intake ventilator with branch-off installed on top, and not on the bottom, towards the ducts, or if we want to reverse the duct for any reason.
