Description

The KWI outlet valve is designed for mounting on ceilings, walls or directly on ducts with use of the special assembly frame RM. The KWI valve has a continuous adjustment of exhausted air by rotating central disc. Selected slot can be fixed by means of a fixing nut. Special construction of the valve ensures a low level of noise as well as easy and fast assembly.

Material: galvanized steel sheet
Finishing: glossy powder painted acc. to RAL 9016
Standard colour: white

Example identification
 Product code: KWI - aaa
 type _____
 Ød _____

* as standard without mounting frame included

Technical Data

Parameters
 Volumetric flow q (l/s or m^3/h), total pressure loss P_t (Pa), and acoustic pressure level L_A (dB(A)), can be read from the figure.

Pressure losses P_t
 The figures show total pressure loss P_t (Pa).

Acoustic pressure level, L_A
 The figure shows acoustic pressure level L_A (dB(A)). The noise level is specified for a room attenuation of 4dB, which translates into attenuation in the reverberation zone of the SABINE room with an acoustic absorption of $10 m^2$.

Dimensions

$\varnothing D$ nom [mm]	$\varnothing A$ [mm]	B [mm]	weight [kg]
